

Paddingtons

BROOKE GROVE

Montgomery Child Care Association, Inc.

August 18-21, 2014

THE MATH OF MAKING PLAY DOUGH

Allie and Violent demonstrate knowledge of comparing and measuring by putting the right amount of salt and sugar in a measuring cup to make play dough.

CREATING PUZZLES

The Paddingtons engaged their problem solving skills when tasked to create their very own puzzles. They first had to draw and paint with water color before cutting and assembling their puzzle.

CRAB SOCCER GOALS

The children engaged in a game of “Crab Soccer” where they had to pick up a ball with their feet and then throw the ball through a crab soccer goal! This activity enhances and demonstrates gross motor skills.

Important updates:

- August. 19 Last day of water play. Parents please remember to label all materials your child brings into school.
- August 22 MCCA closed for clean up day.

 Parents if all possible, please send in updated family pictures. As you can see, your little ones are growing very fast. Thank you again
