

# Cool Cats

**KENSINGTON / FOREST GLEN**

Montgomery Child Care Association, Inc.

*October 23<sup>rd</sup>-27<sup>th</sup>, 2017*

## Building Ring Structures

Free play allows the children to create open ended structures in all centers in the classroom. Ring connectors give the children the opportunity to build and create structures of all colors, heights and widths. Open ended activities can be incorporated in many ways and allows for an expansion of creativity.

## What insects do you see?

In the science center, these Cool Cats were inspecting the various types of insects. They worked together to observe the insects very closely to see how many legs they have, the size of the wings, and what color the bugs are. Science allows the children to explore nature, how it works, and its environment.

## Match the Shapes

In this matching game, the children incorporated different techniques into one game. Each child used the popsicle sticks in a different way such as memory game, sorting by color, designs and shapes. Matching activities are great for improving a child's concentration, memory, vocabulary, and attention to detail.
