October 30- November 3, 2017

Grinding Dry Corn Kernels

After using scientific tools like magnifying glasses and tweezers to examine dry corn kernels, the Little Feet used a hand operated grinder to crush the kernels. As they worked, the children noticed a change in the corn's appearance and texture. This was a great opportunity for the Little Feet to use their gross motor skills as they turned the grinder's handle.

Hammering Golf Tees Into a Pumpkin

The Little Feet enjoyed taking part in a unique experience this week as they hammered golf tees into the shell of a pumpkin! As Adeline carefully and slowly tapped the hammer onto the golf tees, he said “tap, tap, tap” and was so proud of herself one she had driven the tees all the way into the hard shell. Not only was this fun for Adeline, it was also a great opportunity for her to strengthen her fine motor skills and eye-hand coordination as she worked to hit the head of the hammer onto the head of the golf tee and nowhere else!

Making Zucchini Muffins

This week the Little Feet children made delicious and healthy zucchini muffins! When children take part in cooking experiences they practice using basic math skills like measuring, counting, and using number concepts associated with a recipe. Cooking with children also helps them to develop their social emotional skills as they learn to take turns and work with others to accomplish a shared goal. Cooking healthy recipes, like zucchini muffins, can also help children develop a love of healthy foods and healthy eating habits.

2017

01. January	02. February	03. March
04. April	05. May	06. June
07. July	08. August	09. September
10. October	11. November	12. December

Important updates:

- Remember to bring extra set of clothing for your child to keep at the center. It is a good idea to make sure that any clothing currently at the center is appropriate for the weather.

Dear parents,

Don't forget to set your clocks 1 hour back this Sunday November 5th for daylight savings!
